

Unearthing the minerals powering our future

Listed (ASX: CFE), diversified mineral development and investment company that aims to meet global demand for minerals that drive progress and power our future.

Cobalt Projects

Capitalise on an undervalued and emerging cobalt market

Kipushi Cobalt - Copper Project

- » Cobalt-rich tailings dam 25km from Lubumbashi, DRC containing 3.25Mt of tailings.
- » Soludo Lambert (JVC) holds 70% interest (increasing to 75%) in tailings dam.
- » Metallurgical testing shows recoveries of 90% for copper and 85% for cobalt achievable.
- » Processed through new leaching plant (redesign underway).
- » Product - copper-rich hydroxide product containing approx. 30-35% copper and a cobalt-rich hydroxide precipitate containing approx. 10-16% cobalt (dry basis) at a rate of 7,560 tonnes of contained copper & 2,900 tonnes of contained cobalt per year.
- » Drilling programme completed with samples sent for assay.

Exposure to strategic 'battery metals'

Cobalt

Critical commodity, essential to battery chemistry

Powering portable electronic devices & electric vehicles

Lithium

Li-ion batteries now standard for electric vehicles

Solution for ore growing renewable energy revolution

Kipushi Development Timeline*

Production at Kipushi targeted to commence Q3 2020

Testing and Processing

- » Minnovo to be re-engaged to undertake the detailed design of revised Kipushi Leaching Plant;
- » Tailings samples enroute to Australia for further confirmatory metallurgical testwork

Construction

- » Permitting for leaching plant process commenced.
- » Concrete works tendered.
- » Some equipment and fabrication packages tendered.

Production

Targeting Q3 2020 for commencement of production at Kipushi
