

31 October 2018

### **QUARTERLY REPORT – 30 September 2018**

Please find attached the Quarterly Activities Report and Appendix 5B for the period ended 30 September 2018.

Yours faithfully Cape Lambert Resources Limited

Tony Sage **Executive Chairman** 

Cape Lambert Resources Limited (ASX: CFE) is a mineral development company with exposure to cobalt, lithium, copper, iron ore, uranium, and lead-silver-zinc assets in Australia, Europe, Africa and South America.

## Australian Securities Exchange Code: CFE

Ordinary shares 1,011,734,914

#### **CORPORATE**

#### **Strategy and Business Model**

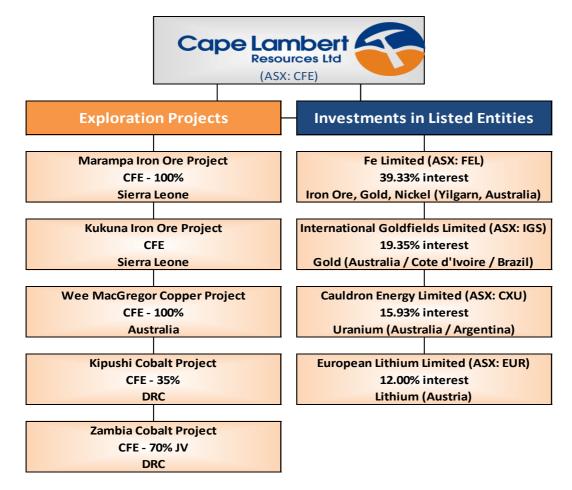

Cape Lambert Resources Limited (ASX: CFE) (Cape Lambert or the Company) is an Australian domiciled mineral development company. Cape Lambert has interests in several exploration and mining companies, providing exposure to iron ore, copper, gold, uranium, cobalt, lithium and lead-silver-zinc assets in Australia, Europe, Africa and South America (refer Figure 1).

Cape Lambert's strategy is to acquire and invest in undervalued and/or distressed mineral assets and companies (**Projects**) and:

- improve the value of these Projects, through a hands on approach to management, exploration, evaluation and development; and
- retain long-term exposure to these Projects through a production royalty and/or equity interest.

Cape Lambert aims to deliver Shareholder value by adding value to these undeveloped Projects. If Projects are converted into cash, the Company intends to follow a policy of distributing surplus cash to Shareholders.

Figure 1: Group Structure September 2018

#### **Cash Balance**

As at 30 September 2018, the Company had approximately A\$841k. Prior to 30 June 2018, the Company controlled FE Limited (**FEL**) and as such consolidated its cash at bank it in accordance with accounting standards. The Company's control over FEL has ceased and as such not accounts for its invetments in FEL using the equity method.

#### **Placements**

On 3 July 2018, the Company completed a placement of 1,000,000 fully paid ordinary shares at \$0.03 per share to raise cash proceeds of \$30,000 (before costs).

On 13 July 2018 the Company completed a placement of 10,600,000 fully paid ordinary shares at \$0.03 per share to raise cash proceeds of \$300,000 (before costs) and settle liabilities of the Company of \$18,000.

On 23 July 2018 the Company completed a placement of 38,924,698 fully paid ordinary shares at \$0.03 per share to raise cash proceeds of \$1,104,741 (before costs) and settle liabilities of the Company of \$63,000.

On 23 July 2018 the Company issued 23,500,000 fully paid ordinary shares to Gulf Energy International Limited upon the exercise of options to raise cash proceeds of \$1,175,000.

Funds raised from the placement will be used towards funding its exploration expenditure activities at the Kipushi Cobalt-Copper Tailings Project in the Democratic Republic of Congo and for general working capital purposes.

The placement shares were issued under Cape Lambert's existing placement capacity under ASX listing rule 7.1 and 7.1A and therefore shareholder approval was not required.

#### **Investments**

#### Kitwe Tailings Project – Zambia

In the June 2018 quarterly, the Company announced that it had executed anew share sale agreement with Zambian entity Australian Mining Company Zambia Limited (**Seller** or **AMCZL**), to conditionally acquire a 60% interest in exploration licence No 21853-HQ-SEL (**Licence or Kitwe Project**) (**Acquisition**). The Licence covers an historic cobalt-copper rich tailings dump located near Kitwe in Zambia. Completion of the Acquisition is subject to the payment of Milestone Payments (refer June 2018 Quarterly dated 30 September 2018).

The Kitwe Project is located approximately 3km from the outskirts of Kitwe, in the Copperbelt region of Zambia. Kitwe is the second largest city, in terms of size and population, in Zambia and is one of the most developed commercial and industrial areas in the nation, alongside Ndola and Lusaka. The Copperbelt is centered around the towns of Ndola, Kitwe, Chingola, Luanshya and Mufulira – a string of towns on Zambia's northern border with the Democratic Republic of Congo.

During the quarter the Company commenced a metallurgical testwork programme on four 25kg tailings samples at the laboratory of Alfred H Knight, which is located in Kitwe. The programme has been designed to test the leaching characteristics of the tailings.

During the quarter the Company engaged drilling contractor Wallis Drilling Pty Ltd and completed an air core drilling of the tailings dump, with 114 holes drilled for a total of 1082m. The samples are being readied for dispatch to a laboratory for assay.

#### **Timis Mining Legal Action**

As previously announced, the Company has commenced legal action against Gerald Metals, Timis Mining Corporation, Frank Timis and others (jointly the **Defendants**) in the High Court of Sierra Leone seeking damages and injunctions against the Defendants (refer ASX announcement dated 15 May 2017, 19 May 2017 and 7 July 2017).

During the quarter, the Company entered into a damages-based agreement with a UK based legal firm to proceed further with the legal matter.

#### **PROJECTS**

#### Marampa (100% interest)

Marampa is an iron ore project at the development stage, and is located 90 km northeast of Freetown, Sierra Leone, West Africa (**Marampa** or **Marampa Project**) (refer Figure 2). Marampa comprises one granted mining licence (ML05/2014) comprising 79.40km² and one granted exploration licence EL46A/2011 – 159.78 km² held by Marampa Iron Ore (SL) Limited, which is indirectly, a wholly owned subsidiary of Cape Lambert.

During the quarter, the Company received a letter from the Sierra Leone Ministry of Mines (MoM) informing Marampa Iron Ore (SL) Limited (Marampa SL) of the cancellation of the Marampa mining license ML05/2014 due to non payment of fees. In September 2014, Marampa SL submitted to the MoM an application letter entitled "Force Majeure to all Cape Lambert Operations in Sierra Leone" which was acknowledged by the MoM. The Company understood that the agreement with the MoM was that force majeure events were aknowledged and authorised and as such no fees would accrue or be payable until a processing facility was operating and Marampa SL is producing iron ore from Marampa. The Company understands that the notice of cancellation of license letter has incorrectly been issued by the new Sierra Leone government who are not aware of the agreement. In order to protect it's position, Marampa SL has engaged Sierra Leone based lawyers BMT Law Chambers who has commenced legal action in the High Court of Sierra Leone against the cancellation of the licence.

#### **Dempsey Resources (100% interest)**

Dempsey Resources holds the Kukuna Iron Ore Project located in Sierra Leone (**Kukuna** or **Kukuna Project**).

The Project is located 120 km northeast of Freetown in the northwest of Sierra Leone and consists of one exploration licence (EL22/2012) covering 68km² (refer Figure 2). The licence is located 70km due north of the Marampa Project and the Pepel Infrastructure and comprises rocks that correlate with the Marampa Group stratigraphy known to host specular hematite mineralisation.

The Kukuna Project remains under care and maintenance.

#### **Kipushi and Kasombo Copper-Cobalt Projects (JV with Paragon Mining SARL)**

The Kipushi Cobalt Copper Tailings Project consists of a tailings dam located on PE 12347 and the Kipushi Processing Plant located adjacent mining licence PE481 (**Kipushi Project**), and retains an interest in the Kasombo Copper-Cobalt Project through its shareholding in FEL (**Kasombo Project**), refer Figure 2. Both projects are located approximately 25km from Lubumbashi, the second largest city in the Democratic Republic of Congo (**DRC**. The Company has a 50/50 joint venture agreement with Paragon Mining SARL (**Paragon**) to develop the projects (refer to ASX announcement dated 3 May 2017 for details of the joint venture arrangement). The joint venture company is Soludo Lambert Mining SAS (**Soludo Lambert**).

#### Kipushi Project

In August 2018, the Company reported that the Engineering Study completed by Minnovo Pty Ltd (Minnovo) was updated to provide for the production of a copper-rich MHP and a cobalt-rich MHP separately (refer ASX announcement dated 20 August 2018). The production of separate products is advantageous as the copper-rich MHP can be sold to copper focused companies whereas, the cobalt-rich MHP can be sold to cobalt focused companies, therefore, greatly expanding the potential buyer base.

During the quarter, Minnovo continued with the detailed design of the 1Mtpa leaching plant and in particular the issuance of specifications for tendering the long lead item equipments. Soludo Lambert issued tenders for thickeners, filter presses, horizontal belt filter, SO<sub>2</sub> scrubber and agitators. Quotations were received and are being reviewed by Minnovo for compliance with the specifications and data sheets.

In addition, fabrication tenders were issued for tankage works (2 packages) and for the workshop/warehouse building. Quotations were received and are currently being assessed.

Soludo Lambert also issued a tender document for the concrete works at the leaching plant to four reputable companies operating in the DRC. Quotations were received and are currently being assessed.

Soludo Lambert also awarded the design of the leach residue storage facility (LRSF) to Golder Associates Africa. Golder visited the site to undertake geotechnical investigations at the proposed LRSF location. Design works on the LRSF has commenced.

In September 2018, Soludo Lambert engaged drilling contractor Solutions for Africa to undertake a drilling programme at the Kipushi TSF. At month end 43 holes for a total of 421m had been completed. The programme plans for 166 holes, however many holes are not accessible to the drill rig, therefore, sampling will be undertaken by other means where possible. A batch of samples has been dispatched to the laboratory of ALS in Lubumbashi for assay. The drill programme is expected to be completed mid-October 2018.

The Company is currently investigating funding opportunities including offtake negotiations and debt financing.

#### Kasombo Project

During the quarter the results of sampling from the trenching programme and other works undertaken at Kasombo 7 were reported by FEL (refer ASX announcement dated 23 August 2018). The following information has also been reported by FEL in their September 2018

quarterly report. Samples taken returned significant cobalt grades from two trenches and strongly anomalous grades in the remainder within the expected stratigraphic sequence particularly when all samples were taken from the heavily leached top few metres of the weathering profile (refer Table 1).

In June 2018, in addition to trenching, the FEL engaged the services of the Department of Geology from the University of Lubumbashi (University), to undertake a ground magnetics and a geochemical survey of the Kasombo area utilizing termite mound sampling. FEL reported that the ground magnetics field work consisted of 12 survey lines of approximately 1.2km each in length, and 400m apart oriented N-S, totalling a cumulative length of 20.2km.

FEL also reported a total of 137 termite mound samples were collected as part of the geochemical survey over the known fragnments and their surrounds The results of the trench mapping and sampling correlated well with the geochemical and magnetic work and have provided good targeting information to possibly extend the known mineralization with future drilling (refer FEL September 2018 quarterly report).

#### Trench summary assay

Trench_ID	From	То	Thick	Co_ppm	Comment
KSB_TR001	20.4	24.9	4.5	650	
KSB_TR001	53.2	61.2	8.0	590	
KSB_TR002	3.0	9.0	6.0	585	
KSB_TR003					no significant Co assay
KSB_TR004	4.0	6.0	2.0	920	
KSB_TR005	21.0	28.0	7.0	690	
KSB_TR006	42.0	52.0	10.0	2050	
KSB_TR007	16.0	28.0	12.0	2300	

#### **Mining International Pty Ltd (100% Interest)**

Mining International Pty Ltd (**Mining International**), is a wholly owned subsidiary of Cape Lambert. The Company holds tenure to 4 mining leases (which were excluded from the sale of the Leichhardt Copper Project) at the Wee MacGregor Project located 40 km southeast of Mt Isa in Queensland (refer Figure 4).

The tenements are located within in the Eastern Fold Belt of the Mt Isa inlier. The tenements are located in the Mary Kathleen Zone/Wonga Subprovince. This area is prospective for a variety of deposit types, most notably structurally controlled epigenetic copper and gold deposits.

Cohiba Minerals Limited (**Cohiba**) has a Farm-in agreement with the Company for mining licences ML 2504, ML 2773 and ML 90098, while Firebird Minerals Pty Ltd (**Firebird**) has a Farm-in agreement for mining licence ML 2771.

On 30 August 2018, Cohiba announced that results from its first phase drilling programme at Wee Macgregor had returned encouraging results. Results reported included:

Hole GC5: 8-10m 1.2% Cu 10-12m 1.38% Cu

Hole WM03: 2-4m 2.15% Cu, 0.063% Co, 1.1ppm Au

4-6m 1.49% Cu, 0.066% Co, 1.3ppm Au

(refer Cohiba ASX announcement dated 30 Augist 2018 for further detail)

Figure 2: Cape Lambert West African Iron Ore Interests

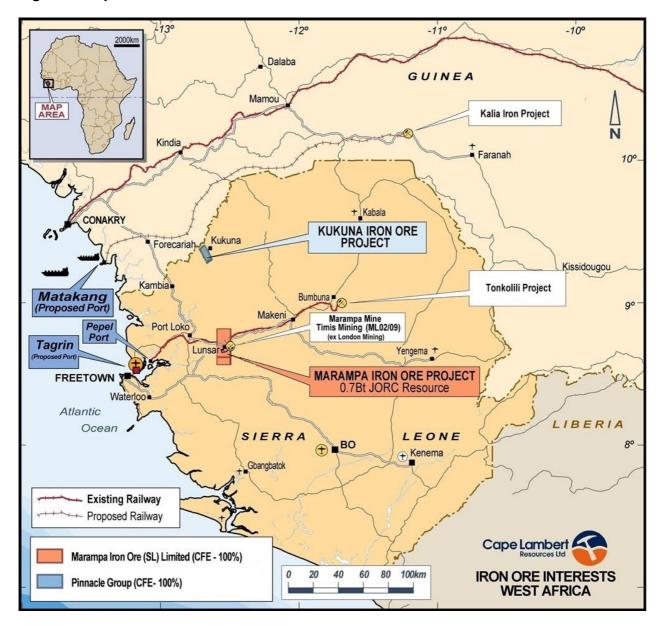

Figure 3: Location of the Kipushi Project and Kasombo Project

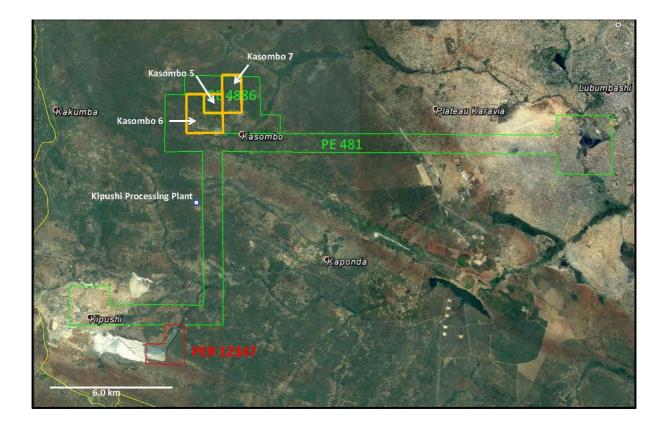

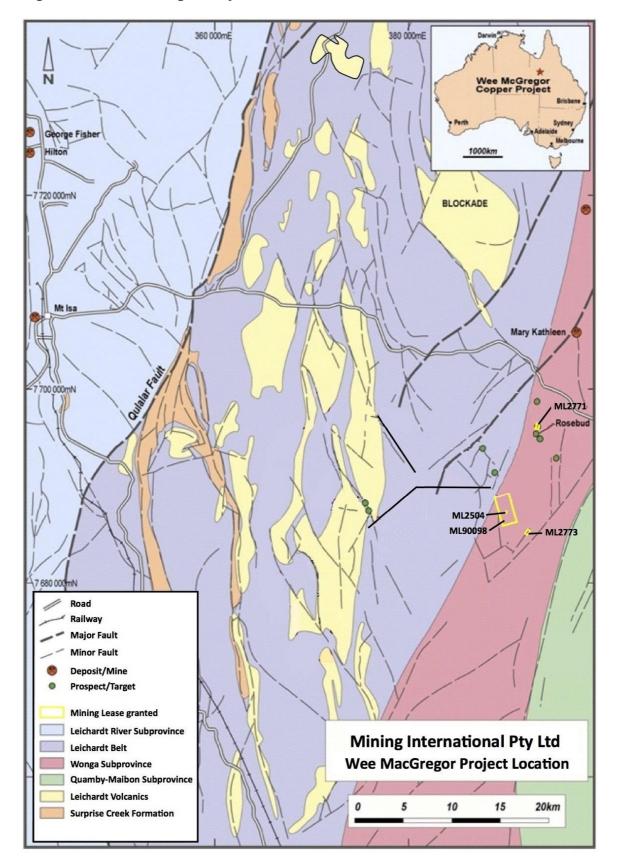

Figure 4: Wee MacGregor Project Location

#### **Appendix 1: Tenement Status**

The mining tenements held at the end of each quarter, acquired and disposed of during the quarter and their location:

Tenement reference	Project & Location	Acquired interest during the quarter	Disposed interest during the quarter	Interest at the end of quarter
Marampa Project - EL 46A/2011	Lunsar - Sierra Leone	-	-	100%⁵
Marampa Project – ML 05/2014	Lunsar - Sierra Leone	-	-	100%⁵
Kukuna Project - EL 22/2012	Kukuna – Sierra Leone	-	-	100%
ML 90098 <sup>1</sup>	Wee MacGregor - Queensland	-	-	100%
ML 2504 <sup>1</sup>	Wee MacGregor - Queensland	-	-	100%
ML 2771 <sup>2</sup>	Wee MacGregor - Queensland	-	-	100%
ML 2773 <sup>1</sup>	Wee MacGregor - Queensland	-	-	100%
21853-HQ-SEL <sup>3</sup>	Zambia	-	-	-
PER 12347 <sup>4</sup>	Kipushi – DRC	-	-	35%

<sup>&</sup>lt;sup>1</sup> Subject to the Cohiba (Cobalt X) Farm-in agreement, refer to ASX March 2017 Quarterly Report for details.

There were no mining tenements with beneficial interest earned/lost in farm-in/farm-out agreements at the end of the quarter.

<sup>&</sup>lt;sup>2</sup> Subject to the Firebird Farm-in agreement, refer to ASX March 2016 Quarterly Report for details.

<sup>&</sup>lt;sup>3</sup> Completion of this transaction is in progress, Refer to ASX announcements for extent of interest.

<sup>&</sup>lt;sup>4</sup> Refer to ASX announcements for extent of interest.

<sup>&</sup>lt;sup>5</sup> Refer to comments above under Marampa.

#### Notes

Print name:

- The quarterly report provides a basis for informing the market how the entity's activities have been financed for the past quarter and the effect on its cash position. An entity that wishes to disclose additional information is encouraged to do so, in a note or notes included in or attached to this report.
- 2. If this quarterly report has been prepared in accordance with Australian Accounting Standards, the definitions in, and provisions of, AASB 6: Exploration for and Evaluation of Mineral Resources and AASB 107: Statement of Cash Flows apply to this report. If this quarterly report has been prepared in accordance with other accounting standards agreed by ASX pursuant to Listing Rule 19.11A, the corresponding equivalent standards apply to this report.
- 3. Dividends received may be classified either as cash flows from operating activities or cash flows from investing activities, depending on the accounting policy of the entity.

<sup>+</sup> See chapter 19 for defined terms. 01/09/2016
